

## MEVD – 301(A) Opto-Electronics Integrated Circuits

### **Unit I**

**Theory of Optical Wave guides:** Wave guide theory : one dimensional planar wave guides, two dimensional wave guides, transcendental equations, wave guide modes, mode cutoff conditions.

### **Unit II**

**Optical Wave guide Fabrication and Characterization:** Waveguide fabrication: deposited films; vacuum-deposition and solution-deposition, diffused waveguides, ion-exchange and ion-implanted waveguides, epitaxial growth of III-V compound semiconductor materials, shaping of waveguides by wet and dry etching techniques. Waveguide characterization: surface scattering and absorption losses, radiation and bending losses, measurement of waveguide loss, waveguide profiling.

### **Unit III**

**Fundamentals of Optical Coupling:** Transverse couplers. Prism couplers. Grating couplers. Fiber to waveguide couplers. Coupling between optical waveguides. Directional couplers. Applications of directional couplers.

### **Unit IV**

**Guided Wave Modulators and Switches:** Physical effects used in light modulators : electro-optic, acousto-optic and magneto-optic effects. Waveguide modulators and switches.

### **Unit V**

**Semiconductor Lasers and Detectors:** Laser diodes. Distributed feedback lasers. Integrated optical detectors.

### **Unit VI**

**Recent Progress in Integrated Optics:** State-of-the-art technology in guided wave devices and applications, e.g. photonic switching, tunable laser diodes, optical integrated circuits.

## MEVD 301 (B) - System on Chip (SOC) Design

### UNIT I

Recent advances in semiconductor technology, Programmable logic devices, such as field programmable gate arrays (FPGAs), Programmable chip architectures, logic synthesis, SoC concepts, and the Verilog synthesizable subset, Implementation of a complex system on a single programmable chip.

### UNIT II

Tools and techniques for designing, verifying and implementing System-on-Chip (SoC) designs using programmable logic. Embedded system applications and their system-level hardware-software co-design.

### UNIT III

Implementation Aspects: Adders, ALUs, Multipliers, Dividers, Register Files, Buses, CISC/RISC, Memory hierarchy (caches, MMU, main memory)

### UNIT IV

ARM System-on-chip architecture.

### UNIT V

**Project Orientation:** Concept to Verilog hardware description language (HDL), verification using simulation, synthesis and programmable device implementation on an FPGA development board.

## MEVD 302 (A) - Communication RF IC Design

### **Unit I**

Basic concepts in RF Design: Analysis & Measurement Techniques. S-Parameter Models, Smith Chart Calculations.

### **Unit II**

Trans-receiver Architecture for Wireless Communication Standards. Non-Linearity, Harmonics, Gain Compression, Desensitization, Cross Modulation, IMD & Inter-symbol Interface.

### **Unit III**

RF IC Design concepts & Device Technologies: Low Noise Amplifiers, Mixers, Frequency Sources, Oscillators & Synthesizers, Power Amplifiers. Noises & Distortions in LNA, PA & Mixer Circuits.

### **Unit IV**

PLL: Theory, Circuits, Distortion & Noises. Microwave Circuit Components & Design Concepts: Single Chip Radio Concepts, Design Issues Surrounding Systems as DECT, GSM, Blue Tooth etc. Case Studies.

## MEVD 302 (B) Embedded System Programming

### **Unit-I**

Introduction to Linux Operating System. Shell Programming, Review of C-Programming and Data Structures.

### **Unit-II**

Overview of Embedded Systems – Sequential and Concurrent Models – Processor Solutions and Types – Types of Memory – Data Representation Formats – Usage of C in Embedded Systems – Programmers view of CPU – IO programming models – Concurrent Software Design – Scheduling – Memory Management – Mixing C & Assembly.

### **Unit-III**

Embedded System Design Issues , Challenges & Trends in Embedded Systems, Assemblers, Compilers, Linkers, Loaders, Debuggers , Profilers & Test Coverage Tools , Utilities like make, ranlib, objcopy & objdump etc.

### **Unit-IV**

Writing device drivers, Writing Time & Space Sensitive Programs, Programming in C for 8051, 68HC11 and 80196 microcontrollers.
